Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "form-fitted" recited in claims 3, 15, 23; the "nozzle is adjustable" recited in claims 8, 19, 26; the "quick-connecting fitting" recited in claims 10, 27, 32, 37 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4-9, 12, 13, 16-21, 24-26, 28, 29, 31, 33, 34, 36 are rejected under 35 U.S.C. 102(b) as being anticipated by Smagac et al. (5,165,482).

Smagac discloses a chemical distribution system comprising : a first portion of tubing 19, 20; a second portion of tubing 27; a connector (connector between tank 9 and piping 18-20, 24).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 2, 3, 14, 15, 22, 23, 30, 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smagac et al. (5,165,482) in view of Valiant (4,175,703).

Smagac discloses the limitations of the claimed invention with the exception of the clamps. Valiant discloses form fitting clamps 27 used to route conduit 20. It would have been obvious to a person having ordinary skill in the art at the time of the invention

to have used the claims of Valiant to route the tubing of Smagac to prevent substantial harm to the appearance of the building (Valiant, column 1, lines 50-54).

6. Claims 10, 27, 32, 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smagac et al. (5,165,482).

Smagac discloses the limitations of the claimed invention with the exception of the quick-connect fitting. Quick-connect fittings are well known in the art. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have provided the connector of Smagac with a quick-connect fitting for quick and ease of connects.

7. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Smagac et al. (5,165,482) in view of Coles (1,235,657).

Smagac discloses the limitations of the claimed invention with the exception of the lever-arm. Coles discloses a connector having a lever-arm 6. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have replaced the connector of Smagac with the connector of Coles for tool free installation.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher S. Kim whose telephone number is (571) 272-4905. The examiner can normally be reached on Monday - Thursday, 6:30 AM - 5:00 PM.
